Liquor recall: Bombay Sapphire London Dry Gin

Recall due to incorrect labelling of alcohol content

St. Albert... The Alberta Gaming and Liquor Commission (AGLC) is assisting with the recall of a specific batch of Bombay Sapphire London Dry Gin in the 1.14 litre (L) bottles as a result of incorrect alcohol content posted on the label.

Customers should not consume the product described below:

| Brand | Size | Lot number |
|--------------------------------|--------|------------|
| Bombay Sapphire London Dry Gin | 1.14 L | L16304 W |

The manufacturer reported some bottles were not properly diluted, resulting in an alcohol content of 77 per cent – not 40 per cent, as listed on the bottle.

Customers who have purchased the 1.14 L size may return any opened or unopened product with lot number L16304 W to the retailer they purchased the product from for a full refund.

In support of the recall, the AGLC is asking all liquor licensees to pull the 1.14 L size bottle with this lot number off their shelves.

To date, no complaints or injuries related to the consumption of this specific product have been reported in Alberta.
